## Advanced Security Systems

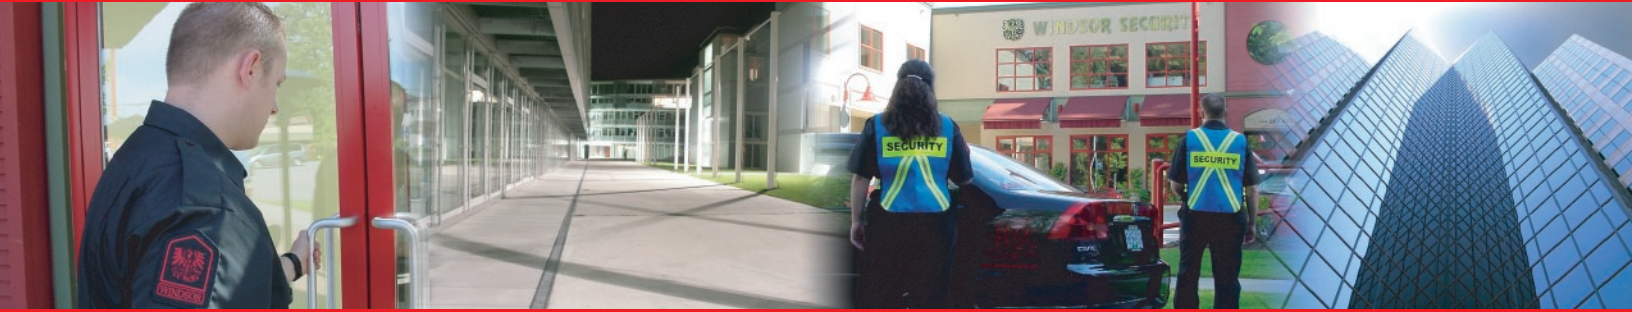

Windsor Security is a leader in Access Control and Alarm System installation tailored towards your business, large or small. Many intrusion and access control systems have "interface capability" for access control at a reasonable cost. Windsor Security provides expertise in using DSC, Ademco, Modern, Europlex, Napco, GE, Cansec, as well as other manufactures products.

Our Technicians can take a sophisticated and complex system and make it easy to use. Every type of business can now afford Security and Access Control Systems thus achieving greater control with your companies operations, ultimately saving operating costs.

Successful Security Solutions

## Security Manpower

We build championship caliber security teams. Our value is contained in our leadership abilities and the knowledge of the workings of a successful security operation. Windsor Security has the single-mindedness of purpose that is required to reach your goals. We use a professional approach at all times especially when dealing with our client's, their staff and customers.

Our Code of Conduct:	
<b>Courtesy</b>	Use professional etiquette, show appreciation
<b>Empathy</b>	Understand different points of view, take the time to determine needs
<b>Personalize The Moment of Truth</b>	Refer to people by name, make people feel welcome
<b>Individual Responsibility</b>	Follow policy and procedures, anticipate others needs
<b>Exceed Expectations</b>	Follow-up to ensure satisfaction

## Mobile Security

Our highly trained Mobile Patrol Alarm Response, On-Site Patrol Personnel and Supervisors are ready to respond to your home, office or business, 24 hours a day, 7 days a week, 52 weeks a year. We specialize in providing highly visible protection for people, homes, industrial, and commercial properties. Our Security Personnel and Supervisors are trained, fingerprinted and licensed through the Provincial Government, Security Programs Division.

We offer Mobile Patrol, Alarm Response, and On-Site Security Personnel. Our security staff take down pertinent information regarding all situations and provide you with extensive and informative reports. These written reports could be used as evidence in court proceedings. We work with Hospitals, Shopping Centres, Institutions, Industrial Sites, Multi-Use Complexes, Strip Malls, Golf Courses, School Districts, Airports and Colleges.

## Access Control Systems

A good company provides a quality product. An excellent company provides a quality product for less. Our objective is to provide better service and to keep your costs down. To increase our flexibility further we support many manufactures, including **Keyscan, Europlex, Kantech, GE, Cansec and DSC.**

Windsor Security can design your system to control the Intrusion System, Environmental Controls and any other equipment that requires automated functions with the swipe of a card or the touch of a finger.

Successful Security Solutions

## CCTV Security Systems

Whether it's monitoring a remote site, shopping mall or government buildings, Windsor Security prides itself in delivering seamless and secure video surveillance to protect people, assets and enterprise. CCTV (Closed Circuit TV) is a key component of a complete security solution. We offer customized systems that will provide cost effective solutions to meet your specific requirements.

From industrial to commercial to retail to government, we have provided our customers with leading edge security solutions. CCTV Systems operate 24 hours a day/ 7 days a week monitoring assets and providing a valuable resource to deter any fraudulent activity. This alone can make up for the initial cost.

## CCTV Hardware

In the past CCTV equipment was primary analog, allowing for only basic video monitoring and playback features. Today's digital systems offer a much broader range of features and options, including:

- Real time video searching
- Video encryption and watermarking
- Remote access video monitoring
- Limitless expandability
- Alarm and access control system integration

## Remote Video Monitoring

One of the most important advantages with modern CCTV systems is the ability to digitally access remote video feeds over the internet and or private networks. Authenticated users can log onto CCTV DVR's (Digital Video Recorder) and in some cases CCTV cameras and view the premises from anywhere in the world.

CCTV DVR's can be connected directly to alarm systems so that when an alarm is activated, notification is immediately transmitted by pager, E-mail or by monitoring station personnel. This allows you or other authorized personnel to promptly view the alarm location, separating false alarms from real events. Police and Windsor Security Patrol Division response time can now be elevated if required and/or save you from costly police false alarm fines. Whether you are at home or on the other side of the world, you can always keep an eye on your business with remote CCTV access.
